## **FAQ:**

**Q:** I found they advertised this product to be "upgraded", can anyone tell me what exactly is being upgraded?

**A:** Compared with other products on the market with 1 or 2 holes, the uniqueness of this product is two different sizes of locking holes: 0.78 inches fitting normal doors, and 1.2 inches fitting doors with larger bolts.

**Q:** Will this door lock still work if somebody with a key tries to open from the outside?

**A:** Yes, because the claw of the lock goes into where the door closes. The front red piece of the lock with the chain will still hold the door closed. So even if someone has a key the door cannot be opened from the outside.
